# For Loops - A way to avoid tedious copy+paste
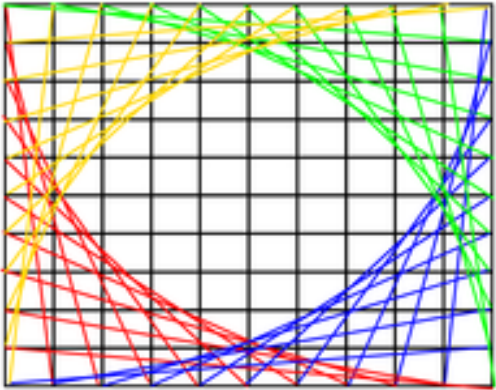

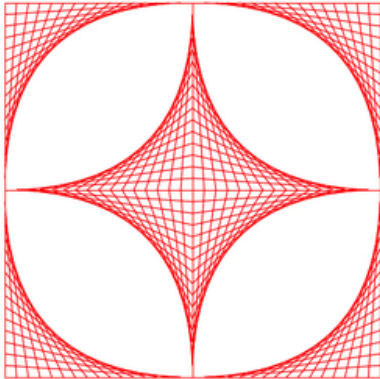

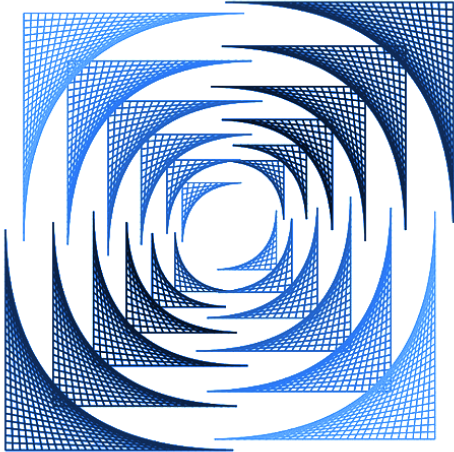

Use for loops and lines to replicate as closely as possible the drawings shown below.

RGB	Grid
There are only three colors in this diagram: Red, Green, and Blue	

Curve Stitching	Flower
Create 4 functions, one for each corner.	Generalize your curve stitching functions by adding parameters that control the placement of each corner.

Extra Challenge: Infinity Curve

Further generalize your curve stitching functions by adding parameters that control both the placement and size of each corner.
